Analysis of Your Resume Against the Job Description

****Strengths:****

1. ****Education****: You have a Bachelor's degree in Computer Science, which meets the required qualification.
2. ****Programming Languages****: You are proficient in Java and JavaScript, which are key requirements for the role.
3. ****Projects****: Your projects demonstrate practical application of your skills in software development, particularly in building web applications.

****Gaps:****

1. ****Experience****: The job requires 1-3 years of experience in software development. As a student, you may not have sufficient professional experience.
2. ****Web Frameworks and REST APIs****: The job description mentions experience with web frameworks and REST APIs, which is not explicitly highlighted in your resume.
3. ****Cloud Platforms****: Familiarity with cloud platforms (AWS, Azure, or GCP) is preferred, but there is no mention of this in your resume.
4. ****Agile/Scrum Methodologies****: The job prefers candidates familiar with Agile/Scrum methodologies, which is not indicated in your resume.
5. ****Problem-Solving Skills****: While you mention analytical skills, providing specific examples of problem-solving in your projects could strengthen your application.

Next Steps

1. ****Enhance Your Resume****: Consider adding any relevant coursework, internships, or experiences that could demonstrate your familiarity with web frameworks, cloud platforms, and Agile methodologies.

2. ****Tailored Cover Letter****: Would you like me to help you generate a tailored cover letter for this job application?

3. ****Track Application****: If you decide to apply, I can help you track this application in a database.
